

DOGMASTERY INC PRESENTS

Issa vom Mutigen Zwinger

Health & Genetics

Issa was advanced at a very young age, performing sit/stays (see left) at only 4 months old. Home was downtown Oakland, and the suburbs of Ross for the first year of her life before transitioning to Orinda full-time. Now at 4 ½ years of age with OFA Good Hips & OFA Normal elbows, she is a very strong and stable female that excels in the work and is a joy to have around the house as well as when out and about on our daily excursions. Her parents are Clea z Kokesova Dvora IGP 1 (HD-Excellent, ED-0) and Elroy Barnero IGP 3 (HD-Normal, ED-0).

Obedience/Behavioral Training

Issa has obtained the highest level of temperament certification, the CGC, CGC-A and CGC-U, sanctioned by our parent organization the American Kennel Club and I have attached a link to these titles below so you can see what is required for certification. She has also obtained her obedience title the BH-VT, which is sanctioned by our parent working organization the FCI. Issa rides comfortably in the car, and has been a passenger on an Embraer Praetor 500, A/C Transit, BART, and on the water via boat. She's an avid swimmer and natural retriever on land and at sea. Some of the kids while playing soccer, playfully pinned Ms. Issa with the nickname "La Delfin."

Home & Family Protection

Not all dogs are capable of performing up to the DogMastery Protection standard as it requires exceptional nerve, disposition, pack-drive and character. Our entire l-litter possessed this standard but Issa supersedes most of her siblings. Some of the exercises that she has performed on all surfaces and equipment are detailed as follows:

Out of Car Apprehension: You will feel comfortable visiting your financial institution and local grocer during any hour with a sense of security. Issa stays in the vehicle with the windows cracked and will not jump out unless called or you're physically assaulted.

Car Alert: assures your family that no intruder/ vagrant can approach or enter your vehicle while driving or unoccupied.

Pop Outs: Allows you the comfort of power walking or jogging at any hour, as Issa understands the difference between a passive and active threat. With a passive threat being someone using a calm controlled voice demanding a withdrawal from you at the ATM, to an active assault in which case the dog rises to the occasion immediately allowing you to escape an uncompromising situation.

She has been desensitized from kicks/hits, gunfire, and loud noises. Issa understands transfer gripping from the exposed sleeve to the body suit and concealed sleeve. She is capable of performing the same advanced apprehension exercises as my federal agents and police officers. All in all, safety will never be a concern with Issa vMZ around.

Overall Disposition

A very stable girl that's housebroken, great with children, rides comfortably in the car and can perform in a threatening situation when necessary. She is comfortable and reliable around livestock, cats and smaller dogs. After long hikes and runs, Issa enjoys hanging out at Larkspur Landing or relaxing in Carmel - just a few of her weekly activities. She is very pleasant in high-traffic retail areas and looks forward to her jaunts up and down College Ave, or shopping on Fillmore Street in San Francisco. She is the ideal companion for any household looking for a loyal family member that is capable of handling a volatile situation.
